

UDACITY- Explore Weather Trends

Student Details : varadha.001@gmail.com

To fetch my city Temperature data:

1)

```
select * from city_list where country ='India' ;
```

Above Query Fetched 22 records and from that selected the nearest city Bangalore

2)

```
select * from city_data where city ='Bangalore' ;
```

```
select * from global_data ;
```

3) **Calculated Moving Average for the range of 10 years (in excel using Data Analysis Tool option)**

year	Globe_Temperature	Year	Bangalore City Temperature	Globe Moving Average	City Moving Average
1750	8.72	1750		#N/A	#N/A
1751	7.98	1751		#N/A	#N/A

Observation :

- 1) My city Temperature (Bangalore,India) is higher than the global temperature by around 15 Degrees.
- 2) City Temperature as well as the global temperature has been increasing (by very small value) as the years progresses. Inference is that the world is getting hotter.
- 3) Lowest Global moving average temperature (span of 10 years) as well as the Bangalore City moving average temperature was in the year 1817. Below we have other details –

Lowest Global moving average Temperature – 7.203

Lowest Bangalore moving average temperature – 23.76

Highest Global moving average Temperature – 9.594 (Year 2015)

Highest Bangalore moving average temperature – 25.71 (Year 2015)

- 4) During the period 1806 to 1817 , there was a dip in global temperature.
- 5) In the year 1995, Moving average global temperature had reached 9 Degrees.
In the year 1945, Bangalore's moving average temperature had reached 25 Degrees.
